José Cortés Becerra

PHP / Laravel Developer

josecortesdev@gmail.com · LinkedIn · GitHub

4+ years of professional experience building web applications. Designed and deployed Nexosend, an SMS platform with a Laravel API and a Vue interface. Fluent in English and open to remote contracts.

Professional experience

Analyst Developer · Tragsatec Oct 2024 – Present
Automate Excel reports and charts from database records and add features to internal applications, including file organization and printable records.

Senior Developer · Visual Data Intelligence Oct 2023 – Oct 2024
Developed software for golf courses and clinics. Built a QR code system that golfers use to enter designated areas and a CRM dashboard that lets staff track campaign performance.

Junior Developer · Adalid Internet SL Dec 2021 – Oct 2023
Developed backend features for two publishing platforms, one in PHP and one in Laravel. Implemented advertising features for digital publications and wrote PHPUnit tests.

Selected projects

Nexosend · SMS scheduling and REST API
Built and tested a messaging platform that tracks bulk sends per recipient. Each recipient has a separate queued job and status record. On pull requests, GitHub Actions runs Laravel tests against MySQL and builds the Vue frontend.
Live application · API documentation · Product demo

Mykelt · Client e-commerce project · 2021
Connected an Angular shopping cart to a Laravel REST API and integrated Stripe payments with Laravel Cashier. Built a CMS so the client could publish and edit articles.
Backend source · Checkout walkthrough

Technical skills

Backend: PHP, Laravel, MySQL, REST APIs
Frontend: Vue.js, JavaScript, Angular, jQuery
Testing and tools: PHPUnit, GitHub Actions, Docker, Git

Education

Degree in Primary Education · University of Granada · 2017
